

ABDELRAHMAN AZMY

Computer Engineering Student

Cairo, Egypt | reach.abdelrahman@gmail.com | (+20)-15-5000-6367

[LinkedIn](#) | [My Portfolio](#)

Education

German University in Cairo (GUC)

Bachelor of Computer Engineering

Cairo, Egypt

Expected Sep 2028

Dar Jana International Schools (DJIS)

American Diploma

Jeddah, Saudi Arabia

Jun 2023

Technical & Creative Skills

Programming Languages: Java, Python, JavaScript, HTML, CSS, MySQL

Data & Analytics: Google Sheets, Excel, Microsoft Dynamics 365

Creative & Media: DaVinci Resolve, Blender, Adobe Photoshop

Core Competencies: KPI Dashboards Creation, GUI Development, Object-Oriented Programming

Professional Experience

SoftTrend

IT Solutions Marketing

Cairo, Egypt

July 2025 – Aug 2025

- Facilitated B2B sales and licensing for enterprise software and cloud solutions, including Microsoft 365, Kaspersky, and Sophos endpoint protection.
- Consulted with clients to analyze their infrastructure needs, proposing tailored hardware and network security packages featuring PCs, switches, and Fortinet/FortiGate firewalls.
- Developed technical proposals and targeted marketing strategies to clearly communicate the value proposition and ROI of integrated IT infrastructures.

German University in Cairo (GUC)

Computer Science Jr. Teaching Assistant

Cairo, Egypt

March 2025 – Present

- Guided undergraduate students during Computer Science lab sessions by simplifying and clarifying complex programming concepts taught in lectures.
- Provided targeted feedback on lab work and assignments to ensure comprehensive understanding of fundamental algorithms and data structures.
- **Courses Contributed To:** CSEN403 (Concepts of Programming Languages), CSEN401 (Computer Programming Lab), CSEN202 (Introduction to Computer Programming), and CSEN102 (Introduction to Computer Science).

Technical Projects

HR Management System | C#, ASP.NET Core 8.0, SQL Server, IIS

- Engineered a comprehensive HR management dashboard using ASP.NET Core 8.0 and C#, implementing robust MVC architecture for scalable data handling and server-side routing.
- Deployed the compiled application to a cloud-based IIS production environment, configuring `web.config` parameters, environment variables, and remote database connection strings.
- Troubleshoot and resolved complex deployment bottlenecks, bypassing active server file-locks (`app_offline.htm`) and debugging production-environment SQL execution errors.
- Managed domain security and reputation by configuring SSL/HTTPS protocols and verifying site ownership via Google Search Console to successfully clear false-positive browser security flags.

Jackaroo Board Game Application | Java, JavaFX, Eclipse IDE

- Directed a development team as Team Lead, successfully navigating and resolving technical and interpersonal conflicts to ensure cohesive collaboration and project delivery.
- Architected the application using the MVC (Model-View-Controller) design pattern and core OOP principles (Abstraction, Polymorphism, Inheritance, Encapsulation) for scalable backend state management.
- Designed and implemented an interactive JavaFX graphical user interface, integrating custom animations and visual feedback seamlessly with the underlying Java game logic.
- Programmed complex game mechanics to manage a 102-card deck, optimizing independent probability actions and player-choice algorithms.

Automated Finance & Analytics Dashboards | Google Sheets

- Architected a personal finance tracking system that captures mobile transaction inputs and automatically categorizes them into a cloud-based database.

- Built a comprehensive analytics dashboard mapping transactional data across 18 unique tabs for granular expense classification.
- Developed interactive B2B academy sales templates to analyze revenue by source, transaction status, and individual team member performance.
- Designed social media campaign templates to extract ad data into actionable insights, identifying engagement strengths and weaknesses.

Leadership & Extracurriculars

IEEE'25 Junior Technical Program

Cairo, Egypt

Media & Design Team Member

Oct 2024 – May 2025

- Directed creative strategy and video production for technical content, enhancing academic exposure for high school students in Data Analysis and Web Development.
- Produced engaging graphic visuals and branding materials to cohesively guide students through university life events and announcements.

Additional Information

Languages: Arabic (Native), English (C1 - IELTS 7.5), Spanish (A2), German (A1)

Standardized Testing: SAT Score 1480/1600 (Math: 800)
